

Compte rendu : S10 Asynchrone

Question 1 :

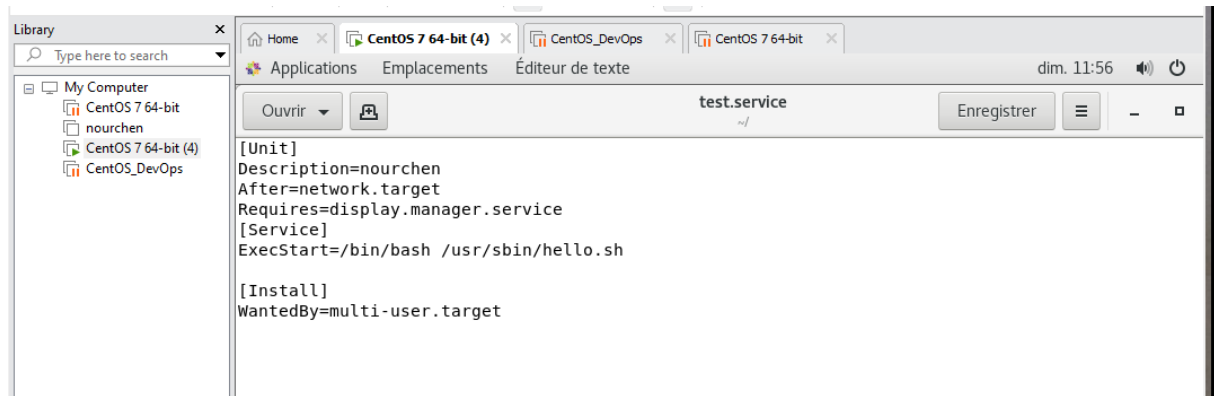

A terminal window titled 'nourchen@localhost:~' showing the following commands and output:

```
[nourchen@localhost ~]$ test.service
bash: test.service: commande inconnue...
[nourchen@localhost ~]$ touch test.service
[nourchen@localhost ~]$ chmod -R 777 test.service
[nourchen@localhost ~]$ gedit test.service
```

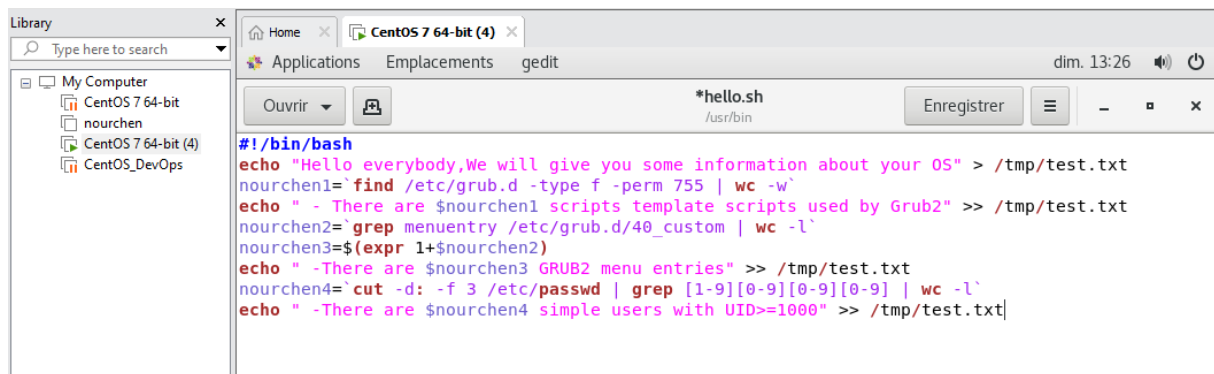

A Gedit editor window titled '*test.service' showing the following content:

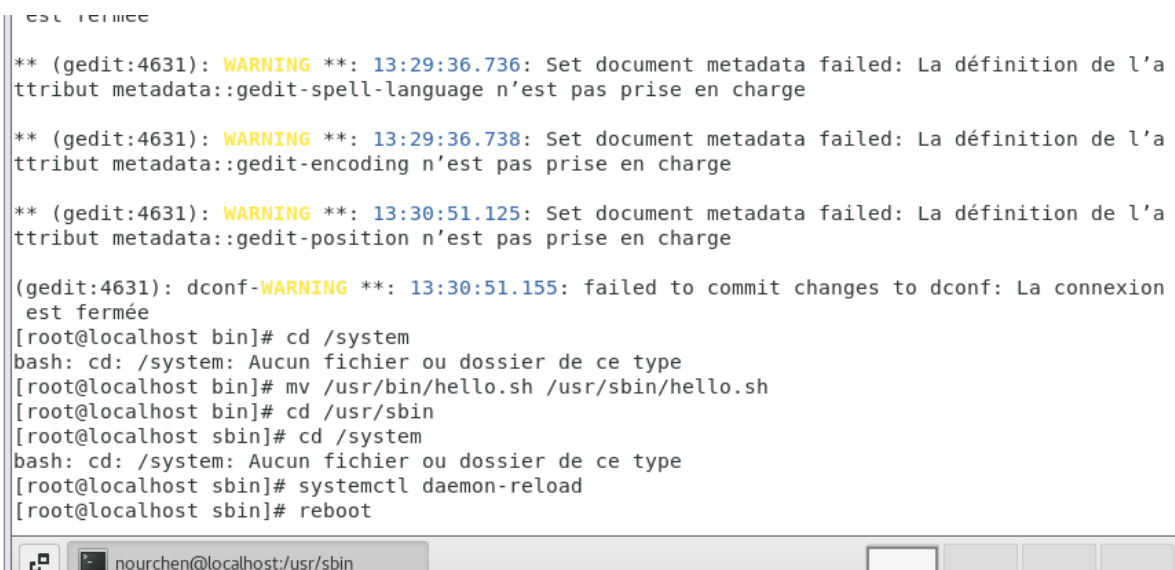

```
[Unit]
Description=nourchen
After=network.target
Requires=display.manager.service
[Service]
```

Question 4 :

Question 5 :

Question 6 :

Dans cette je n'ai pas trouvé la solution nécessaire

```
^C
[root@localhost nourchen]# cat /tmp/test.txt
cat: /tmp/test.txt: Aucun fichier ou dossier de ce type
[root@localhost nourchen]# cd /etc/systemd/system/
[root@localhost system]# systemctl enable test.service
Failed to execute operation: No such file or directory
[root@localhost system]# mv /home/nourchen/test.service /etc/systemd/system/multi-user.target.wants/test.service
[root@localhost system]# cd /etc/systemd/system/multi-user.target.wants
[root@localhost multi-user.target.wants]# ls
